

Sequence Format Conversion

[Bioinformatics Tools FAQ](#) | [References](#) | [Help & Support](#)

Introduction

Sequence Format Conversion (SFC) tools help to re-format your input sequences. Sequences can be read and written in a variety of formats. If you don't hold your sequence in a recognised standard format, you will not be able to analyse your sequence easily.

Important Note

- There is currently a limit of **2MB**.
- We kindly ask all users of EMBL-EBI Web Services to submit tool jobs in **batches of no more than 30 at a time** and not to submit more until the results and processing is complete. Please ensure that a valid email address is provided. Excessive usage of a particular resource will be dealt with in accordance with [EMBL-EBI's Terms of Use](#). Please [contact us](#) if you need further information.

REST Service	Description
EMBOSS seqret	EMBOSS Seqret reads and writes (returns) sequences.
