European Nucleotide Archive (ENA): An introduction: webinar

Sam Holt [1]

- DNA & RNA
- Beginner
- 0.5 hour

The European Nucleotide Archive (ENA) provides a comprehensive record of the world's nucleotide sequencing information, covering raw sequencing data, sequence assembly information and functional annotation. Get acquainted with what the European Nucleotide Archive is and how our services can support your work. Learn about how to submit your data to our open-access archive, or how to search interesting data submitted by others.

This webinar is for researchers interested in using the ENA. No prior knowledge of bioinformatics is required, but an undergraduate level understanding of biology would be useful.

This webinar was recorded on 03 April 2019.

NB: This video works best using Google Chrome and when viewed in full screen.

Find out about upcoming webinars [2].

Learning objectives:

- Basic understanding of the European Nucleotide Archive and how it can help you to access and submit DNA sequence data
- Know where to find out more about the European Nucleotide Archive

Your feedback

Please tell us what you thought about this webinar. Your feedback is invaluable and helps us to improve our courses and thus enhance your learning experience.
